## **UMTS / 3G PCMCIA drive - USB to CardBus**

### **Description**

The Delock PCMCIA drive is simply connected externally via USB to your PC or notebook. Thus, Delock provides a mobile and quick solution to use PCMCIA as well as Novatel UMTS cards. Power is supplied via the USB connector. This way you can make use of Internet services any time when you are on the road. You can purchase suitable UMTS cards from T-Mobile and Vodafone.
